

Wheels and Tires

I got my wheels from www.worksman.com.

Some people are using a cheaper Chinese wheel that looks very similar but I wouldn't trust it.

The part number from Worksman is Item #329 WHL:3/4BRNG:26X2.125W/AIRTIRE.

It is not uncommon for these rims to get bent as they are basically bicycle wheels that never see any lateral loading as the bicyclist always leans into the corners. When used on a 4 wheel vehicle, the wheels don't lean and that puts a huge load on the spokes.

Springs

I got the leaf springs from Witmer Coach Shop

1070 W. Main St

New Holland PA 17557

(717)656-3411

Part No 14-504

1/4" Seat Spring

They cost \$39 each in 2007

Be sure to ask for their catalogue when you order. Lots of neat stuff available.

They don't seem to have a website.
